The manager, **John Wilson**, has a proven track record of achieving results for his clients by following the simple principle of “winning by not losing”. His core equity strategy focuses on a concentrated portfolio of quality companies and uses options, tactical cash allocation and a well-defined investment process, including loss limits and sell discipline to reduce risk and enhance returns.

How can your clients benefit from John’s strategy?

- Limiting negative returns allows your clients to stay invested
- Clients who stay invested can benefit from the power of compounding and build their wealth over time

Sprott Enhanced Equity Class is an **ideal core equity fund** for risk-averse investors.

Sprott Enhanced Equity Class

Downside Capture/Upward Capture – measure how much of the benchmark return is being captured by the Fund, in periods when the benchmark was negative/positive.

Upmarket Return/Downmarket Return – the Fund’s cumulative return in periods when the benchmark was positive/negative.

Downside Deviation – measures the variation of returns around the average mean return of periods that fall below zero. The lower the number, the better.

Sortino Ratio – measures risk-adjusted return. It is the excess return over the risk-free rate divided by the downside semi-variance, so it measures the return to downside volatility. The higher the ratio, the better.
