Capital gains tax ^{3,4}	\$30
Total income tax (savings)	(\$566)
Money at risk⁵	\$434
Break-even proceeds of disposition⁶	\$593

SPROTT 2016-II FLOW-THROUGH LIMITED PARTNERSHIP

What are Flow-Through shares?

The Federal Government allows Canadian resource companies that invest in the oil and gas, mining and renewable energy sectors to fully deduct certain exploration expenses, known as Canadian Exploration Expenses (CEE). To raise capital for exploration, those companies often issue flow-through shares and pass along the rights to claim the CEE to the purchasers of those shares. The shareholders are then able to deduct the CEE against their own income.

What is a Flow-Through Limited Partnership?

Flow-through limited partnerships are professionally managed diversified portfolios of flow-through shares. The amounts invested are generally 100% deductible against taxable income in the year the investment is made.

Most flow-through limited partnerships have a life span of two years or less. At termination of the partnership, unitholders receive shares of an open-ended mutual fund corporation on a tax-deferred basis. The adjusted cost base of their shares (ACB) is reduced by the tax deductions and increased by any capital gains from the investments sold within the limited partnership portfolio.

Tax benefits of flow-through limited partnerships

Tax Savings

The cost of flow-through limited partnerships is 100% tax-deductible in the year they are purchased. In addition, the proceeds from the disposition of the partnership are taxable as capital gains.

Tax Efficiency

Investing in flow-through shares effectively converts income into capital gains, allowing investors to take advantage of any capital loss carry-forwards.

The following summary is of a general nature only and is not intended to be, nor should it be construed to be, legal or tax advice to any particular purchaser of units of Sprott 2016-II Flow-Through Limited Partnership (the "Partnership"). Purchasers acquiring units with a view to obtaining tax advantages should obtain independent tax advice from a tax advisor who is knowledgeable in the area of income tax law and is able to determine optimal use of an investor's federal and provincial deductions and/or credits, as well as impact, if any, on an investor's liability for alternative minimum tax.

This offering is only made by prospectus. The Partnership's prospectus contains important detailed information about the securities being offered. Copies of the prospectus may be obtained from your IROC registered financial advisor. Investors should read the prospectus before making an investment decision.

This is a speculative offering. The purchase of units involves significant risks. There is no assurance of a return on a subscriber's initial investment. Please refer to the prospectus for the complete list of risk factors associated with an investment in the units.

¹ Based on maximum offering.

² For illustrative purposes only, the Highest Marginal Tax Rate in Ontario.

³ Assumed that 50% of capital gains are taxable in computing a Limited Partner's income.

⁴ Assumed that the Flow-Through Shares held by the Partnership are sold by the Partnership at the price at which the Partnership acquired the shares. If Flow-Through Shares are purchased at a premium to the market price, the market price must appreciate in order for the Partnership to sell the shares at the price at which the Partnership acquired the shares.

⁵ Calculated as total investment by Limited Partner less total income tax savings from deductions.

⁶ Represents the amount an investor must receive such that after paying capital gains tax, the investor would recover the money at risk. Calculated as money at risk divided by one minus the product of (i) an assumed 45% marginal tax rate multiplied by (ii) the rate at which capital gains are taxed in the year of disposition, which is currently 50%.
