

## Summary Prospectus

April 29, 2024

### Sprott Funds Trust

#### Sprott Junior Gold Miners ETF (NYSE Arca: SGDJ)

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus (including amendments and supplements) and other information about the Fund, including the Fund's statement of additional information and shareholder reports, online at <https://www.sprottetfs.com>. You can also get this information at no cost by calling (888) 622-1813, or from your financial professional. The Fund's prospectus and statement of additional information, both dated April 29, 2024, as amended and supplemented from time to time, are incorporated by reference into (legally made a part of) this Summary Prospectus. Information on the Fund's net asset value, market price, premiums and discounts, and bid-ask spreads can be found at <https://www.sprottetfs.com>.

*This Summary Prospectus contains information you should know before investing, including information about risks. Please read it before you invest and keep it for future reference.*

The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

## Summary Prospectus — Sprott Junior Gold Miners ETF

### Investment Objective

The Sprott Junior Gold Miners ETF (the “Fund”) seeks investment results that correspond (before fees and expenses) to the performance of its underlying index, the Solactive Junior Gold Miners Custom Factor Index (ticker symbol SOLJGMFT) (the “Underlying Junior Gold Miners Index”).

### Fund Fees and Expenses

The table below describes the fees and expenses that you pay if you buy, hold and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

<u>Shareholder Fees</u> (fees paid directly from your investment)	<u>None</u>
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fee . . . . .	0.35%
Distribution and Service (12b-1) Fees . . . . .	None
Other Expenses . . . . .	0.18%
Total Annual Fund Operating Expenses . . . . .	0.53%
Fee Waiver/Expense Reimbursement <sup>1</sup> . . . . .	0.03%
Total Annual Fund Operating Expenses After Fee Waiver/ Expense Reimbursements . . . . .	0.50%

<sup>1</sup> Sprott Asset Management USA Inc. (the “Adviser”), the investment adviser to the Fund, has contractually agreed to waive the management fee, and/or reimburse expenses so that Total Annual Fund Operating Expenses After Fee Waiver/Expense Reimbursements (not including distribution (12b-1) fees, shareholder service fees, acquired fund fees and expenses, taxes, brokerage commissions and extraordinary expenses) do not exceed a maximum of 0.50% of the share’s average daily net assets through April 30, 2025. The Adviser will be permitted to recover expenses it has borne through the agreement described above to the extent that the Fund’s expenses in later periods fall below the annual rates set forth in the expense agreement. The Fund’s fee waiver/expense reimbursement arrangements with the Adviser permit the Adviser to recapture only if any such recapture payments do not cause the Fund’s expense ratio (after recapture) to exceed the lesser of (i) the expense cap in effect at the time of the waiver and (ii) the expense cap in effect at the time of the recapture. The Fund will not be obligated to pay any such deferred fees and expenses more than three years after the particular date in which the fees and expenses was deferred. This expense agreement may only be terminated during the period by the Board of Trustees of Sprott Funds Trust (the “Trust”).

### Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling shares.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund’s operating expenses remain the same. The example assumes that the Expense Limit will be terminated after one year.

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Although your actual costs may be higher or lower, based on these assumptions your costs would be: . . . . .	\$51	\$167	\$293	\$662

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may result in higher transaction costs and higher taxes when shares are held in a taxable account. These costs may affect the Fund’s performance. These costs, which are not reflected in annual fund operating expenses or in the Example, may affect the Fund’s performance. For the fiscal year ended December 31, 2023, the Fund’s portfolio turnover rate was 70% of the average value of its portfolio.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” — or indexing — investment approach designed to track the performance of the Underlying Junior Gold Miners Index. The Underlying Junior Gold Miners Index aims to track the performance of “junior” gold companies primarily located in the U.S., Canada and Australia whose common stock, American Depositary Receipts (“ADRs”) or Global Depositary Receipts (“GDRs”) are traded on a regulated stock exchange in the form of shares tradeable for foreign investors without any restrictions. Junior companies include early-stage mining companies that are in the exploration stage only or that hold properties that might not ultimately produce gold. Most of these companies are in the development and exploration phase and are on the lookout for land with a higher chance for uncovering large mineral deposits. The Underlying Junior Gold Miners Index is compiled by Solactive AG (the “Index Provider”).

In order to be included in the Underlying Junior Gold Miners Index, companies must be an index component of the Solactive Global Gold Explorers & Developers Total Return Index. The Solactive Global Gold Explorers & Developers Total Return Index includes companies defined/identified as a gold explorer or gold producer. A quarterly revenue growth factor is only applied to the producers while a price momentum factor is only applied to explorers and developers. Companies mainly active in the streaming and royalty business are excluded from that definition. On selection days existing index members of the Solactive Global Gold Explorers & Developers Total Return Index must have free float market capitalization of USD \$100 million. New index members need to have a free float market capitalization of USD \$200 million. Furthermore, new index members must have a minimum Average Daily Traded Value of at least USD \$500,000, while existing index members must have a minimum Average Daily Traded Value of at least USD \$200,000, over the past 3-months. In the Underlying Junior Gold Miners Index, companies that have a free float market capitalization of greater than USD \$2 billion are excluded.

The Underlying Junior Gold Miners Index employs a modified market capitalization weighted methodology such that each constituent comprises no more than 9% of the weight of the Underlying Junior Gold Miners Index as of each rebalance, provided that, as of each rebalance, no more than 50% of the weight of the Underlying Junior Gold Miners Index may consist of constituents comprising greater than 4.5% of the weight of the Underlying Junior Gold Miners Index. A company in the Underlying Junior Gold Miners Index will be classified as a gold mining company if it earns over 50% of its revenue from the mining of gold.

The Underlying Junior Gold Miners Index is reconstituted and rebalanced semi-annually five business days after the close of the third Thursday of May and November. Under normal circumstances, at least 80% of the Fund’s assets (net assets plus borrowings for investment purposes) will consist of securities issued by gold mining companies, and at least 80% of the Underlying Junior Gold Miners Index will consist of such companies.

The Fund will normally invest at least 90% of its net assets in securities that comprise the Underlying Junior Gold Miners Index.

The Fund may engage in securities lending.

## Principal Risks of Investing in the Fund

***There is no assurance that the Fund will meet its investment objective. The value of your investment in the Fund, as well as the amount of return you receive on your investment in the Fund, may fluctuate significantly. You may lose part or all of your investment in the Fund or your investment may not perform***

**as well as other similar investments. Therefore, you should consider carefully the following risks before investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency.**

**Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. Therefore, you should consider carefully the following risks before investing in the Fund.**

*Gold and Silver Mining Industry Risk.* The Fund is sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the gold and silver mining industry. In times of stable economic growth, traditional equity and debt investments could offer greater appreciation potential and the value of gold, silver and other precious metals may be adversely affected, which could in turn affect the Fund's returns. The gold and precious metals industry can be significantly affected by competitive pressures, central bank operations, events relating to international political developments, the success of exploration projects, commodity prices, adverse environmental developments and tax and government regulations.

*Market Risk and Selection Risk.* Market risk is the risk that one or more markets in which the Fund invests will go down in value, including the possibility that the markets will go down sharply and unpredictably. The value of a security or other asset may decline due to changes in general market conditions, economic trends or events that are not specifically related to the issuer of the security or other asset, or factors that affect a particular issuer or issuers, exchange, country, group of countries, region, market, industry, group of industries, sector or asset class. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, e.g., COVID-19, recessions, or other events could have a significant impact on the Fund and its investments. Selection risk is the risk that the securities selected by Fund management will underperform the markets, the relevant indices or the securities selected by other funds with similar investment objectives and investment strategies. This means you may lose money.

*Authorized Participant Concentration Risk.* Only an Authorized Participant (as defined in the Creations and Redemptions section of the Fund's prospectus) may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as Authorized Participants. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Fund shares may trade at a discount to net asset value per share ("NAV") and possibly face trading halts and/or delisting.

*Commodity Risk.* Commodity prices may be influenced or characterized by unpredictable factors, including, where applicable, high volatility, changes in supply and demand relationships, weather, agriculture, trade, changes in interest rates and monetary and other governmental policies, action and inaction. Securities of companies held by the Fund that are dependent on a single commodity, or are concentrated on a single commodity sector, may typically exhibit even higher volatility attributable to commodity prices. The Index measures the performance of Uranium Companies and not the performance of the price of uranium itself. The securities of Uranium Companies may under- or over-perform the price of uranium over the short-term or the long-term.

*Concentration Risk.* The Fund seeks to track the Underlying Junior Gold Miners Index, which itself is currently concentrated in the gold and silver mining industry. Underperformance or increased risk in such concentrated areas may result in underperformance or increased risk in the Fund.

*Common Stock Risk.* Common stock holds the lowest priority in the capital structure of a company, and, therefore, takes the largest share of the company's risk and its accompanying volatility. The value of the common stock held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or facts relating to specific companies in which the Fund invests.

*Currency Risk.* The Funds may invest its assets in securities denominated in non-U.S. currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of a Fund's investment and the value of the Shares. Because a Fund's NAV is determined in U.S. dollars, a Fund's NAV could decline if the currency of the non-U.S. market

in which a Fund invests depreciates against the U.S. dollar, even if the value of a Fund's holdings, measured in the foreign currency, increases. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in a Fund may change quickly and without warning and you may lose money.

*Cybersecurity and Disaster Recovery Risks.* Information and technology systems relied upon by the Fund, the Adviser, the Fund's other service providers (including, but not limited to, the Fund Accountant, Custodian, Transfer Agent, Administrator, Distributor and index providers), market makers, Authorized Participants, financial intermediaries and/or the issuers of securities in which the Fund invests may be vulnerable to damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons, security breaches, usage errors, power outages and catastrophic events such as fires, tornadoes, floods, hurricanes and earthquakes. Although the Adviser and the Fund's other service providers have implemented measures to manage risks relating to these types of events, if these systems are compromised, become inoperable for extended periods of time or cease to function properly, significant investment may be required to fix or replace them. The failure of these systems and/or of disaster recovery plans could cause significant interruptions in the operations of the Fund, the Adviser, ALPS Advisors, Inc., the Fund's sub-adviser (the "Sub-Adviser"), the Fund's other service providers, market makers, Authorized Participants, financial intermediaries and/or issuers of securities in which the Fund invests and may result in a failure to maintain the security, confidentiality or privacy of sensitive data, impact the Fund's ability to calculate its net asset value or impede trading.

*Depository Receipt Risk.* The Fund may invest in depository receipts which involve similar risks to those associated with investments in foreign securities. Investments in depository receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Underlying Junior Gold Miners Index, may negatively affect the Fund's ability to replicate the performance of the Underlying Junior Gold Miners Index.

*Early Close/Trading Halt Risk.* An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

*Emerging Markets Securities Risk.* Emerging markets are subject to greater market volatility, lower trading volume, political and economic instability, uncertainty regarding the existence of trading markets and more governmental limitations on foreign investment than more developed markets. In addition, securities in emerging markets may be subject to greater price fluctuations than securities in more developed markets. Differences in regulatory, accounting, auditing, and financial reporting and recordkeeping standards could impede the Adviser's ability to evaluate local companies and impact the Fund's performance. Investments in securities of issuers in emerging markets may also be exposed to risks related to a lack of liquidity, greater potential for market manipulation, issuers' limited reliable access to capital, and foreign investment structures. Additionally, the Fund may have limited rights and remedies available to it to pursue claims against issuers in emerging markets.

*Fluctuation of Net Asset Value Risk.* The NAV of the Fund's shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of the shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for shares on NYSE Arca, Inc. (the "NYSE Arca"). The Adviser cannot predict whether the shares will trade below, at or above their NAV. The Fund's market price may deviate from the value of its underlying portfolio holdings, particularly in times of market stress, with the result that investors may pay significantly more or receive significantly less than the underlying value of the Fund shares bought or sold. This can be reflected as a spread between the bid and ask prices for the Fund quoted during the day or a premium or discount in the closing price from the Fund's NAV.

*Foreign Investment Risk.* The Fund's investments in non-U.S. issuers may involve unique risks compared to investing in securities of U.S. issuers. Adverse political, economic or social developments could undermine the value of the Fund's investments or prevent the Fund from realizing the full value of its investments. Countries with emerging markets may present heightened risks of nationalization of businesses, restrictions on foreign ownership and prohibitions on the repatriation of assets. The economies of emerging markets countries also may be based on only a few industries, making them more vulnerable to changes in local or global trade conditions and more sensitive to debt burdens, inflation rates or adverse news and events.

Where all or a portion of the Fund's underlying securities trade in a market that is closed when the market in which the Fund's shares are listed and trading in that market is open, there may be changes between the last quote from its closed foreign market and the value of such security during the Fund's domestic trading day. In addition, please note that this in turn could lead to differences between the market price of the Fund's shares and the underlying value of those shares.

*Geographic Concentration Risk.* To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region.

*Australia.* Investments in Australian issuers may subject the Fund to regulatory, political, currency, security, and economic risk specific to Australia. The Australian economy is heavily dependent on exports from the energy, agricultural and mining sectors. This makes the Australian economy susceptible to fluctuations in the commodity markets. Australia is also dependent on trading with key trading partners.

*Canada.* Investments in Canadian issuers may subject the Fund to economic risk specific to Canada. Among other things, the Canadian economy is heavily dependent on relationships with certain key trading partners, including the United States and China. The Canadian economy is sensitive to fluctuations in certain commodity markets.

*Indonesia.* Investments in Indonesian issuers may subject the Fund to economic risk specific to Indonesia. Among other things, Indonesia is located in a part of the world that has historically been prone to natural disasters such as tsunamis, earthquakes, volcanic eruptions and typhoons, and is economically sensitive to environmental events. Any such event may adversely impact Indonesia's economy or business operations of companies in Indonesia, causing an adverse impact on the value of the Fund.

*Index Performance Risk.* There can be no guarantee or assurance that the methodology used to create the Index will result in the Fund achieving positive returns. Further, there can be no guarantee that the methodology underlying the Index, or the daily calculation of the Index will be free from error. It is also possible that the value of the Index may be subject to intentional manipulation by third-party market participants. The Index used by the Fund may underperform other asset classes and may underperform other similar indices. Each of these factors could have a negative impact on the performance of the Fund.

The Index has significant exposure to non-U.S. companies in emerging and frontier markets. Limited availability and reliability of information, less uniformity in accounting, auditing and financial record-keeping standards in emerging and frontier markets countries increases potential for errors in index data, computation or construction, which could have a negative impact on the Fund's performance. In addition, the Adviser has limited ability to oversee the index provider's due diligence processes with respect to index data used in index computation, construction or rebalancing. Certain attributes of companies domiciled in foreign countries may present issues with respect to an investment company tracking equity securities issued by such companies including jurisdictions that subject such investments to withholding taxes.

*Index Management Risk.* The Fund is not "actively" managed. Therefore, it would not necessarily sell a security because the security's issuer was in financial trouble unless that security is removed from the Underlying Junior Gold Miners Index.

*Additionally, the Fund rebalances its portfolio in accordance with its Underlying Index, and, therefore, any changes to the Underlying Index's rebalance schedule will result in corresponding changes to the Fund's rebalance schedule.*

*Index Tracking Risk.* The Fund's return may not match or achieve a high degree of correlation with the return of the Index for a number of reasons, including operating expenses incurred by the Fund not applicable to the Index, costs in buying and selling securities, asset valuation differences and differences between the Fund's portfolio and the Index resulting from legal restrictions, cash flows or operational inefficiencies. To the extent the Fund utilizes a sampling approach, it may experience tracking error to a greater extent than if the Fund sought to replicate the Index.

*Industry Concentration Risk.* Because the Fund's assets will be concentrated in an industry or group of industries to the extent the Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries.

*Infectious Illness Risk.* An outbreak of an infectious respiratory illness, COVID- 19, caused by a novel coronavirus has resulted in travel restrictions, disruption of healthcare systems, prolonged quarantines, cancellations, supply chain disruptions, lower consumer demand, layoffs, ratings downgrades, defaults and other significant economic impacts. Certain markets have experienced temporary closures, extreme volatility, severe losses, reduced liquidity and increased trading costs. These events will have an impact on the Fund and its investments and could impact the Fund's ability to purchase or sell securities or cause elevated tracking error and increased premiums or discounts to the Fund's NAV. Other infectious illness outbreaks in the future may result in similar impacts.

*Investment Risk.* An investment in the Fund is subject to investment risk including the possible loss of the entire principal amount that you invest.

*Issuer-Specific Risk.* The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

*Large-Capitalization Risk.* Returns on investments in securities of large companies could trail the returns on investments in securities of smaller and mid-sized companies. The securities of large-capitalization companies may also be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

*Liquidity Risk.* It may be more difficult for the Fund to buy and sell significant amounts of some securities without an unfavorable impact on prevailing market prices. As a result, these securities may be difficult to dispose of at a fair price at the times when the Sub-Adviser believes it is desirable to do so.

*Management Risk.* In certain circumstances, it may not be possible or practicable to purchase all of the securities in the Index in the proportionate weightings, in which case the Fund may purchase a sample of the securities in the Index or use various other available investment techniques in seeking to replicate generally the performance of the Index as a whole. This is known as "representative sampling." To the extent the Fund uses representative sampling, the Fund may not achieve the intended results.

*Micro-Capitalization Company Risk.* Micro-cap stocks involve substantially greater risks of loss and price fluctuations because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices tend to be more volatile. The shares of micro-cap companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the future ability to sell these securities.

*Non-Correlation Risk.* The Fund's return may not match the return of the Underlying Junior Gold Miners Index for a number of reasons, including operating expenses incurred by the Fund not applicable to the Underlying Junior Gold Miners Index, costs in buying and selling securities, asset valuation differences and differences between the Fund's portfolio and the Underlying Junior Gold Miners Index resulting from legal restrictions, cash flows or operational inefficiencies. An active trading market for shares of the Fund may not develop or be maintained. Please also note that in times of market stress, market makers or authorized participants may step away from their respective roles in making a market in shares of the Fund and in executing purchase or redemption orders, and that this could in turn lead to variances between the market price of the Fund's shares and the underlying value of those shares.

*Non-Diversified Fund Risk.* The Fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund.

*Passive Investment Risk.* The Fund is not actively managed, and Sub-Adviser generally does not attempt to take defensive positions under any market conditions, including declining markets. As the Fund will not fully replicate the Underlying Index, it is subject to the risk that the Sub-Adviser's investment strategy may not produce the intended results.

*Portfolio Turnover Risk.* The strategy used by the Fund may result in high portfolio turnover. A higher portfolio turnover will result in higher transactional costs and may result in higher taxes when Fund shares are held in a taxable account.

*Sector Focus Risk.* The Fund may invest a significant portion of its assets in one or more sectors and thus will be more susceptible to the risks affecting those sectors.

*Mining Sector Risk.* The exploration and development of mineral deposits involve significant financial risks over a significant period of time, which even a combination of careful evaluation, experience and knowledge may not eliminate. Few properties which are explored are ultimately developed into producing mines. Major expenditures may be required to establish reserves by drilling and to construct mining and processing facilities at a site. In addition, mineral exploration companies typically operate at a loss and are dependent on securing equity and/or debt financing, which might be more difficult to secure for an exploration company than for a more established counterpart.

*Securities Lending Risk.* Although the Fund will receive collateral in connection with all loans of its securities holdings, the Fund would be exposed to a risk of loss should a borrower default on its obligation to return the borrowed securities (e.g., the loaned securities may have appreciated beyond the value of the collateral held by the Fund). In addition, the Fund will bear the risk of loss of any cash collateral that it invests.

*Small- and Mid-Capitalization Company Risk.* Smaller and mid-size companies often have narrower markets, less liquidity, more limited managerial and financial resources and a less diversified product offering than larger, more established companies. As a result, their performance can be more volatile, which may increase the volatility of the Fund's portfolio.

*Trading Risk.* Shares of the Fund may trade on NYSE Arca, Inc. (the "NYSE Arca"), above (premium) or below (discount) their NAV. The NAV of shares of the Fund will fluctuate with changes in the market value of the Fund's holdings. The market prices of the Fund's shares will fluctuate continuously throughout trading hours based on market supply and demand and may deviate significantly from the value of the Fund's holdings, particularly in times of market stress, with the result that investors may pay more or receive less than the underlying value of the Fund shares bought or sold. When buying or selling shares in the secondary market, you may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask), which is known as the bid-ask spread. In addition, although the Fund's shares are currently listed on the NYSE Arca, there can be no assurance that an active trading market for shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the NYSE Arca, make trading in shares of the Fund inadvisable. In stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

## **Performance**

The following information provides some indication of the risks of investing in the Fund by showing how the Fund's performance has varied over time.

On July 19, 2019, the Sprott Junior Gold Miners ETF (the "Junior Predecessor Fund"), a series of the ALPS ETF Trust, was reorganized into the Fund, a series of Sprott Funds Trust (the "Reorganization"). The Fund is a continuation of the Junior Predecessor Fund and, therefore, the performance information shown prior to July 22, 2019 presents the performance of the Junior Predecessor Fund. The following bar chart and table provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for certain time periods compare with the average annual returns of the target index and of other benchmarks

of market performance. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Total return figures assume reinvestment of dividends and include the effect of the Fund's recurring expenses. Shareholder reports containing financial and performance information will be distributed to shareholders semi-annually. Updated performance information will be available at no cost by visiting [www.sprottetfs.com](http://www.sprottetfs.com) or by calling (888) 622-1813.

**Annual Total Returns (calendar year ended 12/31)**

Highest Quarterly Return . . . . .	66.58%	(June 30, 2020)
Lowest Quarterly Return . . . . .	-34.90%	(March 31, 2022)

The after-tax returns presented in the table below are calculated using highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

## Average Annual Total Returns

For periods ended December 31, 2023

	1 Year	5 Year	Since Inception (March 30, 2015)
Return Before Taxes . . . . .	6.61%	5.89%	3.97%
Return After Taxes on Distributions . . . . .	4.78%	5.00%	3.35%
Return After Taxes on Distributions and Sale of Fund Shares . . . . .	1.98%	6.76%	0.67%
Solactive Junior Gold Miners Custom Factors Total Return Index* (reflects no deduction for fees, expenses or taxes) . . . . .	8.03%	6.72%^	4.82%^
S&P 500 Index* (reflects no deduction for fees, expenses or taxes) . . . . .	26.29%	15.69%	11.97%

\* Index performance shown in the table is the total return, which assumes reinvestment of any dividends and distributions during the time periods shown.

^ From the Junior Fund's inception to July 19, 2019, the Junior Fund's objective was to track the Sprott Zacks Junior Gold Miners Total Return Index ("predecessor index") and since that date the Junior Fund has been seeking to track the Solactive Junior Gold Miners Custom Factors Total Return Index. The index performance presented reflects the performance of the predecessor index through July 19, 2019 and thereafter reflects the performance of the Solactive Junior Gold Miners Custom Factors Total Return Index.

## Management

### Adviser

Sprott Asset Management USA Inc. is the investment adviser to the Fund.

### Sub-Adviser

ALPS Advisors, Inc. is the sub-adviser to the Fund.

### Portfolio Managers

Ryan Mischker, Senior Vice President, Portfolio Management & Research, Andrew Hicks, Senior Vice President, Director of ETF Portfolio Management & Research, and Charles Perkins, Associate Vice President, Portfolio Management & Research at ALPS Advisors, Inc., are responsible for the day-to-day management of the Fund. Mr. Mischker and Mr. Hicks have each served in such capacity since the Fund's inception in July 2019 and previously with the Junior Predecessor Fund since March 2015 and March 2016, respectively. Mr. Perkins has served as portfolio manager for the Fund since March 2024.

## Purchase and Sale of Fund Shares

The Fund issues and redeems shares at NAV only in a large specified number of shares each called a "Creation Unit," or multiples thereof, and only with "authorized participants" that have entered into contractual arrangements with ALPS Distributors, Inc., the Fund's distributor ("Distributor"). A Creation Unit consists of 10,000 shares. Creation Unit transactions are typically conducted in exchange for the deposit or delivery of in-kind securities in the Fund's portfolio and/or cash.

Individual shares of the Fund may only be purchased and sold on NYSE Arca through brokers. Shares of the Fund are listed on NYSE Arca and because shares will trade at market prices rather than NAV, shares of the Fund may trade at a price greater than or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) when buying or selling shares in the secondary market (the "bid-ask spread").

Information regarding the Fund's NAV, market price, premiums and discounts, and bid-ask spreads can be viewed on the Fund's website at [www.sprottetfs.com](http://www.sprottetfs.com).

### **Tax Information**

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account ("IRA") or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

### **Payments to Broker-Dealer and Other Financial Intermediaries**

If you purchase shares through a broker-dealer or other financial intermediary, the Adviser or other related companies may pay the intermediary for the sale of shares or related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
