

Sprott ETFs provide investors with access to innovative and unique indexes that are designed to outperform passive market cap-weighted offerings.

**Sprott Gold Miners Exchange Traded Fund (NYSE Arca: SGDM)** seeks investment results that correspond (before fees and expenses) generally to the performance of its underlying index, the Solactive Gold Miners Custom Factors Index (Ticker: SOLGMCFT).

The Index aims to track the performance of larger-sized gold companies whose stocks are listed on Canadian and major U.S. exchanges. The Index uses a transparent, rules-based methodology designed to emphasize larger-sized gold companies with the highest revenue growth, free cash flow yield and the lowest long-term debt to equity. The Index is reconstituted on a quarterly basis to reflect the companies with the highest factor scores.

<sup>4</sup> From July 22, 2019 forward, Index data reflects the Fund's current underlying Index, the Solactive Gold Miners Custom Factors Index (SOLGMCFT), which was created by Solactive AG ("Index Provider") to provide a means of generally tracking the performance of gold mining companies whose stocks are traded on Canadian and major U.S. exchanges. Index data prior to July 22, 2019, reflects the Fund's former index, the Sprott Zacks Gold Miners Index (ZAXSGDM). Index data shown for periods that include dates prior to July 22, 2019, reflect a blend of the performance of the SOLGMCFT and ZAXSGDM Indices. An investor cannot invest directly in an Index. SGDM was reorganized from ALPS ETF Trust into Sprott ETF Trust on or about July 19, 2019. SGDM is a continuation of the prior Fund and, therefore, the performance information shown includes the prior Fund's performance.

<sup>5</sup> Sprott Asset Management USA, Inc. (the "Adviser"), the Investment Adviser to the Fund, has contractually agreed to waive the management fee, and/or reimburse expenses so that Total Annual Fund Operating Expenses After Fee Waiver/Expense Reimbursements (not including distribution (12b-1) fees, shareholder service fees, acquired fund fees and expenses, taxes, brokerage commissions and extraordinary expenses) do not exceed a maximum of 0.50% of the share's average daily net assets through April 30, 2025. See the most recent prospectus for more information.

#### IMPORTANT DISCLOSURES & DEFINITIONS

<sup>1</sup> Factors that Matter™ refers to the stock selection and index weighting criteria co-developed by Sprott Asset Management LP and Solactive AG to construct the Solactive Gold Miners Custom Factors Index (Index Ticker: SOLGMCFT). These customized factors are selected because they have historically proven to be strong predictors of stock performance, and include fundamental metrics such as revenue growth, long-term debt-to-equity and price momentum.

**An investor should consider the investment objectives, risks, charges and expenses carefully before investing. To obtain a Sprott Gold Miners ETF Statutory Prospectus, which contains this and other information, visit <https://sprottetfs.com/sgdm/prospectus>, contact your financial professional or call 1.888.622.1813. Read the Prospectus carefully before investing.**

The Fund is not suitable for all investors. There are risks involved with investing in ETFs including the loss of money. The Fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in a single investment's market value could cause greater share price fluctuation than in a diversified fund.

The Fund will be concentrated in the gold and silver mining industry. As a result, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the gold and silver mining industry. Also, gold and silver mining companies are highly dependent on the price of gold and silver bullion. These prices may fluctuate substantially over short periods of time so the Fund's Share price may be more volatile than other types of investments. Funds that emphasize investments in small/mid cap companies will generally experience greater price volatility. Funds investing in foreign and emerging markets will also generally experience greater price volatility.

**Shares are not individually redeemable. Investors buy and sell shares of the Sprott Gold Miners ETF on a secondary market. Only market makers or "authorized participants" may trade directly with the Fund, typically in blocks of 10,000 shares.**

Funds that emphasize investments in small/mid cap companies will generally experience greater price volatility. Diversification does not eliminate the risk of experiencing investment losses. ETFs are considered to have continuous liquidity because they allow for an individual to trade throughout the day. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses, affect the Fund's performance.

Sector weightings are determined using the Bloomberg Industry Classification Standard ("BICS").
