Managed Distribution Policy

The Board of Directors of Sprott Focus Trust, Inc. (the “Fund”) has authorized a managed distribution policy (“MDP”). Under the MDP, the Fund pays quarterly distributions at an annual rate of 6% of the average of the prior four quarter-end net asset values, with the fourth quarter being the greater of this annualized rate or the distribution required by IRS regulations. With each distribution, the Fund will issue a notice to its stockholders and an accompanying press release that provides detailed information regarding the amount and composition of the distribution (including whether any portion of the distribution represents a return of capital) and other information required by the Fund’s MDP. You should not draw any conclusions about the Fund’s investment performance from the amount of distributions or from the terms of the Fund’s MDP. The Fund’s Board of Directors may amend or terminate the MDP at any time without prior notice to stockholders.

¹ Royce & Associates, LLC served as investment adviser of the Fund from November 1, 1996 to March 6, 2015. After the close of business on March 6, 2015, Sprott Asset Management LP and Sprott Asset Management USA, Inc. became the investment adviser and investment sub-adviser, respectively, of the Fund.

² Russell Investment Group is the source and owner of the trademarks, service marks, and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group. The Russell 3000 index measures the performance of the largest 3,000 U.S. companies. The performance of an index does not represent exactly any particular investment, as you cannot invest directly in an index.

Important Performance and Risk Information

All performance information reflects past performance, is presented on a total return basis, net of the Fund's investment advisory fee, and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Current performance may be higher or lower than performance quoted. Returns as of the most recent month-end may be obtained at www.sprottfocustrust.com. The market price of the Fund's shares will fluctuate, so shares may be worth more or less than their original cost when sold.

The Fund is a closed-end registered investment company whose shares of common stock may trade at a discount to their net asset value. Shares of the Fund's common stock are also subject to the market risks of investing in the underlying portfolio securities held by the Fund.

The Fund's shares of common stock trade on the Nasdaq Select Market. Closed-end funds, unlike open-end funds, are not continuously offered. After the initial public offering, shares of closed-end funds are sold on the open market through a stock exchange. For additional information, contact your financial advisor or call (203) 656-2430. Investment policies, management fees and other matters of interest to prospective investors may be found in the closed-end fund prospectus used in its initial public offering, as revised by subsequent stockholder reports.

Sprott Focus Trust

Whitney George

DEAR FELLOW SHAREHOLDERS,

We are disappointed to report that Sprott Focus Trust (FUND) had a challenging year in 2018. Focus Trust lost 17.01% of its net asset value (NAV) for the 12-month period with the bulk of the damage occurring in a difficult fourth quarter (-13.55%). By comparison, our benchmark Russell 3000 Index fell 5.24% for the year and

declined 14.30% in the fourth quarter. Not surprisingly, we lost some ground in our ongoing effort to narrow, and ultimately eliminate, Focus Trust's market price discount to its NAV. At year-end (12/31/18), Focus Trust traded at a 13.60% discount compared to an 11.31% discount at the beginning of 2018. This conspired to produce a total shareholder return of -19.15% for the calendar year, not a pleasant result but this is where the bad news ends.

If history is a guide, we believe that 2019 will be a better year for Sprott Focus Trust, and the positive results thus far for the month of January indicate so (10.76% gain in net asset value for the month). The discipline we employ to take advantage of market corrections to refresh Focus Trust's portfolio, should set us up for improvement. We buy while others are selling, in order to capture more than a fair share of an eventual recovery. 2018 marked the fifth time in 20 years that Sprott Focus Trust has posted a negative return. In each of the four previous occurrences of negative annual performance, Focus Trust went on to enjoy two consecutive years of positive performance. There is nothing to convince us that this time will be different. In terms of Focus Trust's current market price discount to NAV, we do have ultimate control over this and will continue to address it. Sprott Focus Trust's longer-term returns continue to be satisfactory in absolute terms, and will improve in relative terms as time distances us from the Federal Reserve's five-year experiment with 0% interest rates. As we have discussed before, we believed the period between 2011 and 2016, when the Federal Reserve held interest rates at or near 0%, produced a suspension of capitalism which is so important to proper business valuation and discounting. While we may have already achieved interest rate normalization, and expect it to positively impact our portfolio of high-quality, undervalued businesses, there is no guarantee that we will not revisit less than 0% real interest rates again. In that event, we would expect our overexposure to hard assets themes to dramatically outperform just as they did in the two years leading up to 2011.

As promised, the Federal Reserve raised short-term rates four times over the course of 2018. Each bump was greeted with progressively more volatility and broader negative market performance. Our two visits with 10-year government Treasury yields over 3%, produced nearly instant market corrections. As the year progressed, market

stresses that showed up initially in only the periphery of emerging markets, ultimately worked their way to the core of U.S. equities with Apple Inc. (pun intended) declining almost 40% at the end of 2018. Also, as promised, President Trump began his attack on trade imbalances; he started with our closest allies, Canada and Mexico, continuing onto Europe and South Korea, and ending with escalating tariffs on China. What was initially viewed as political posturing in an election year, ended up causing a global growth scare of epic proportions. While some softening in "Tariff man's" attack on China trade materialized in the final weeks of 2018, the markets still need to contend with the March 1, 2019 deadline when the current truce is set to end.

Finally, the government shutdown over an immaterial border wall and the ongoing investigations of the President's closest advisors conspired to round out a long list of worries. Expectations for S&P 500 earnings growth in 2019 are migrating toward zero, given the combination of cooling global economic growth and the unrealistic mark set by 2018 earnings growth, which was bolstered by the Tax Cuts and Jobs Act (signed into law by President Trump on December 22, 2017). The broad market price-earnings ratio (P/E) contracted more than any year since the 1930s.

We began 2019 with a very tall wall of worries after a broad equity market correction that neared a bear market. As longtime contrarian investors, it is hard to imagine a better environment for finding attractive investment opportunities.

Activity

Sprott Focus Trust's portfolio turned over 31% in 2018. This was within our long-term expectation of mid-to-high 20s, derived from our three- to five-year holding target. Remarkably, Focus Trust's churn in 2018 was close to 2017's rate (29%). We would expect higher turnover during more volatile markets and last year we saw the dramatic return of volatility after its extraordinary disappearance in 2017. Further, merger and acquisition activity, another source of turnover, returned to our portfolio in a minor way in 2018 after a two-year hiatus. Last year we witnessed a noticeable lack of daily liquidity in most of our investments driving intra-day volatility. We made a consensus decision to avoid unnecessary transactions that would carry a higher than normal frictional cost. We expect merger and acquisition activity to pick up at this stage of the market cycle and we will not be surprised if 2019 produces an above-average turnover rate.

In 2018, we added five new positions to Focus Trust's portfolio: Arcosa, Stelco Holdings, Centamin, Reliance Steel & Aluminum and Smart Sand. Reliance Steel & Aluminum and gold miner Centamin are former portfolio holdings that we have followed for many years.

Arcosa is a new company in the infrastructure, construction and materials business, spun out from Trinity Industries this past fall. Stelco Holdings is Canada's lowest-cost steel manufacturer after bankruptcy reorganization. Smart Sand is a producer of northern white sand used to frack oil wells. Each of these new investments represents an opportunity created by the uncertainty associated with the 2018 trade disputes. Reliance Steel, Arcosa and Stelco are likely to greatly benefit from any new infrastructure rebuild which we believe is the only area of agreement in Washington for the next two years.

Deletions to Sprott Focus Trust's portfolio in 2018 included Syntel, which was acquired in mid-year 2018 by Atos (now Atos Syntel). TGS-NOPEC Geophysical Company reached and exceeded our valuation target in the first half of the year. Carbo Ceramics was replaced by Smart Sand as a fracking play. Osisko Mining and Fortuna Silver Mines were replaced by the additions of higher-quality, dividend-paying companies in the precious metals allocation of our portfolio. Lastly, Randgold Resources merged into Barrick Gold, creating an interesting new company which we have elected to keep.

During 2018, our top-five contributors to Sprott Focus Trust performance were Syntel, TGS-NOPEC Geophysical Company, Kennedy-Wilson Holdings, Amgen and MKS Instruments. As previously mentioned, Syntel was acquired by Atos, TGS-NOPEC achieved our price target, as did both MKS Instruments and Amgen (briefly). MKS left our portfolio mid-year but returned in the fourth quarter during the large correction in the technology sector. Kennedy-Wilson, a real estate asset manager, remains a top holding of Focus Trust. Collectively our top winners contributed just under 3% of positive performance in 2018.

By contrast, our top-five detractors cost our portfolio nearly 9% and included Thor Industries, Western Digital Corporation, Cirrus Logic, Lam Research and Artisan Partners Asset Management. All of these companies are high conviction, long-term holdings in Sprott Focus Trust and have often been top performers in the past. We took the opportunity to add to all of these names during the severe price corrections each suffered in 2018.

Top Contributions to Performance Year-to-date through 12/31/2018 (%) ¹	Top Detractors from Performance Year-to-date through 12/31/2018 (%) ¹
Syntel, Inc. 1.49	Thor Industries, Inc. -3.10
TGS-NOPEC Geophysical Company ASA 0.56	Western Digital Corp. -2.55
Kennedy-Wilson Holdings, Inc. 0.38	Cirrus Logic, Inc. -1.20
Amgen Inc. 0.27	Lam Research Corp. -1.08
MKS Instruments Inc. 0.24	Artisan Partners Asset Management, Inc. -1.02

¹ Includes dividends

Figure 1

An examination of last year's sector performance for Sprott Focus Trust leaves little to cheer about. Only Real Estate and Health Care,

with modest weights, produced positive returns. Financial Services (principally asset managers) Information Technology, Materials and Consumer Discretionary, all detracted by 3% or slightly more. While Materials, mostly our precious metals positions, were recovering by the fourth quarter, nine month gains in energy reversed with collapsing oil prices. Information Technology shares also fell dramatically late in 2018 as a direct result of trade tensions. We took advantage of these opportunities and added to both the Energy and Information Technology sectors.

Figure 2

Positioning

As we entered 2019, Sprott Focus Trust was fully invested with a cash position of 2.1%. During the market correction in last year's fourth quarter, we invested in a combination of old favorites and several new positions, as mentioned previously. We placed a heavy emphasis on those securities that were correcting the most aggressively, principally in the Information Technology, Energy and Consumer Discretionary sectors. We currently own 46 equity positions, which is consistent with our historical range of 40 to 50 investments. Materials (19.5%), Information Technology (17.2%) and Financial Services (15.3%) represented our three largest sectors at yearend. Materials, represented mostly by our 10 holdings in the precious metals complex, performed positively, tracking a strong, uncorrelated, advance in gold prices. Technology shares reacted violently to fears of a global slowdown

caused by the escalation of trade wars. Financial Services represented mostly by asset management companies, were also under pressure from increased volatility and lower market averages. We significantly overweighted the portfolio relative to our benchmark in Energy and Materials, hard asset themes, and underweighted Health Care and Industrials. Our long-term investors will notice that in comparison to yearend 2017, eight of our top 10 holdings remain although their rankings may have shifted slightly. Of 2017's top 10, Cal-Maine Foods and Federated Investors have moved to a slightly lower weighting in our portfolio. Cirrus Logic, one of our biggest winners in 2015 and 2016, is now back in the top 10 along with Lam Research, which was a top performer in 2017 and which corrected sharply in late 2018.

Last year we predicted that we were poised for outperformance based on our overall portfolio diagnostics. On average, we owned higher-quality companies at cheaper valuations than our benchmark, the Russell 3000 Index. We were wrong. In 2018, valuation and quality had little effect on performance as investor preference continued to narrow to favor only the largest market-cap technology leaders. We believe that this preference may have ended in the fourth quarter of 2018, as news headline tracked the rout in FAANG stocks (Facebook, Amazon, Apple, Netflix and Google).

As we start 2019, the portfolio diagnostics are more attractive than they were at the end of 2015, our last negative performance year. In 2015, the markets corrected twice. Once in August, when China made a surprise currency devaluation and again in December when Federal Reserve Chair Janet Yellen raised interest rates for the first time in the middle of another China slowdown scare. At 12/31/2018, our portfolio carried a weighted average P/E ratio of 12.2x, a weighted average P/B ratio of 1.8x and a weighted average dividend yield of 2.99%. By comparison at 12/31/15, these ratios were P/E 13.3x, P/B 1.7x and dividend yield 2.34%. Going into 2019, we are pleased that Sprott Focus Trust represents a higher-quality and less expensive portfolio, when one compares its metrics to those of the Russell 3000: weighted average P/E ratio of 16.9x, a weighted average P/B ratio of 2.7x and a weighted average dividend yield of 2.05%.

Meanwhile, the quality of Sprott Focus Trust's portfolio based on return on invested capital (ROIC) and balance sheet leverage has remained high. Currently, weighted average ROIC is 19.58% versus 21.81% in 2015, and the portfolio's leverage ratio is 1.86x versus 1.85x. We believe these metrics have set us up for a very strong performance period

Figure 3

¹ **Geometric Average.** This weighted calculation uses each portfolio holding's market cap in a way designed to not skew the effect of very large or small holdings; instead, it aims to better identify the portfolio's center, which Sprott believes offers a more accurate measure of average market cap than a simple mean or median.

² **Harmonic Average.** This weighted calculation evaluates a portfolio as if it were a single stock and measures it overall. It compares the total market value of the portfolio to the portfolio's share in the earnings or book value, as the case may be, of its underlying stocks.

³ The Fund's P/E ratio calculation excludes companies with zero or negative earnings (6.5% of portfolio holdings as of 12/31/18).

Outlook

Sprott Focus Trust is off to a strong start in 2019. January's 10.76% gain in net asset value was the strongest monthly performance we have enjoyed since lifting out of the great financial crisis in the spring of 2009. Global equity markets advanced with few exceptions across all regions and market capitalizations. Shortly after raising rates for the fourth time in 2018 and declaring Federal Reserve balance sheet reductions on "autopilot," Chair Jerome Powell reversed himself indicating a far more cautious approach. Very quickly, the market consensus view shifted from four rate increases in 2019 to none. Now we are learning that the Federal Reserve may be content holding a permanently larger balance sheet, ending the need for quantitative tightening.

Additionally, trade talks between the U.S. and China have temporarily replaced the expanding tariff wars that began in mid-2018. We believe that markets have already priced in the trade truce, acknowledging that things are not likely to get worse, but markets have yet to respond to any potential for trade to improve. This will be a somewhat binary event over the next weeks.

The U.S. economy appears fairly strong while earnings growth expectations and P/E multiples have contracted sharply. Halfway through the fourth quarter earnings reporting season, we have seen some very positive price reactions to reports that were not as bad as expected. In one year, market sentiment has changed from very high expectations of growth, fueled by Tax Cuts and Jobs Act, to the

current somewhat skeptical view that there may be no growth in corporate earnings at all. We believe we are investing in a far safer environment than at this time last year.

In 2019, we expect political news to continue to dominate headlines and have short-term impacts on markets. The China trade issue, the ongoing Mueller investigations of President Trump and Brexit are all likely to be short-term market moving events. Considering the longer term, we will need to endure the consequences of political scrutiny of the largest social media companies, geopolitical risks, and the continuing rise of populism and its effects on our capitalistic system.

In our minds, the greatest long-term risk remains the growing mountain of unfunded liabilities across the U.S. economy. The national debt and expanding deficits, entitlement programs, and growing unfunded pension liabilities need to be addressed at some point. We have pointed out before that our President's approach to problem solving involves turning an issue into a crisis. As we approach the 2020 elections, our national balance sheet issues could easily become short-term campaign fodder. We are already starting to hear rumblings of novel solutions to these issues. One worth following is Modern Monetary Theory (MMT). In short, a country that prints its own currency should never run out. Governments have an obligation to their societies and should prudently issue their currency for the betterment of that society. In short, the U.S. will never run out. Unfortunately, MMT has been tried before with disastrous results. It is no surprise to us that gold has recently performed better.

On a brighter note, we believe that 2019 could bring some new initiatives on long-awaited infrastructure spending. This seems to be one of the only source of agreement within our divided Congress. Late in 2018, we added several new positions that would benefit from a demand increase in steel and other construction materials. Perhaps, once we get past a decision "to build or not to build a wall" on the Mexican border, Congress might find other projects it can tackle.

Finally, we expect 2019 to see increased merger and acquisition activity, which showed up in our portfolio modestly in 2018 after two years of no activity. Given the shrinking supply of publically traded companies through mergers, buybacks and limited IPO (initial public offering) activity, we expect that consolidation within industries will be a leading driver of growth. Further, the massive appetite for private equity funds almost guarantees buyout activity in that newly raised funds have a finite horizon in which to be invested. We expect to lose a larger number of our holdings to this trend given our preference for unlevered balance sheets and high-quality metrics. While we never look forward to losing a long-term high conviction holding, it is an inevitable (and often highly profitable) part of the investment cycle which we have not seen since 2006-2007.

We continue to be optimistic about the prospects for Sprott Focus Trust as evidenced by our own large ownership position. The Sprott Group, along with my family and I, currently own approximately 9 million shares, or over 35%, of the Fund's outstanding common stock; this compares to 7.75 million shares at the end of 2018. Many thanks to all of our fellow shareholders for your patience and support.

Sincerely,
W. Whitney George

Important Performance and Risk Information

All performance information reflects past performance, is presented on a total return basis, and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Current performance may be higher or lower than performance quoted. Returns as of the most recent month-end may be obtained at www.SprottFocusTrust.com. The market price of the Fund's shares will fluctuate, so shares may be worth more or less than their original cost when sold. The Fund normally invests primarily in small/mid cap companies, which may involve considerably more risk than investing in larger-cap companies. The Fund also generally invests a significant portion of its assets in a limited number of stocks, which may involve considerably more risk than a broadly diversified portfolio because a decline in the value of any one of these stocks would cause the Fund's overall value to decline to a greater degree. Regarding the "Top Contributors" and "Top Detractors" tables shown on page 3, the sum of all contributors to, and all detractors from, performance for all securities in the portfolio would approximate the Fund's performance for 2018.

History Since Inception

The following table details the share accumulations by an initial investor in the Funds who reinvested all distributions and participated fully in primary subscriptions for each of the rights offerings. Full participation in distribution reinvestments and rights offerings can maximize the returns available to a long-term investor. This table should be read in conjunction with the Performance and Portfolio Reviews of the Funds.

³ Includes a return of capital.

Distribution Reinvestment and Cash Purchase Options

Why should I reinvest my distributions?

By reinvesting distributions, a stockholder can maintain an undiluted investment in the Fund. The regular reinvestment of distributions has a significant impact on stockholder returns. In contrast, the stockholder who takes distributions in cash is penalized when shares are issued below net asset value to other stockholders.

How does the reinvestment of distributions from the Fund work?

The Fund automatically issues shares in payment of distributions unless you indicate otherwise. The shares are generally issued at the lower of the market price or net asset value on the valuation date.

How does this apply to registered stockholders?

If your shares are registered directly with the Fund, your distributions are automatically reinvested unless you have otherwise instructed the Fund's transfer agent, Computershare, in writing, in which case you will receive your distribution in cash. A registered stockholder also may have the option to receive the distribution in the form of a stock certificate.

What if my shares are held by a brokerage firm or a bank?

If your shares are held by a brokerage firm, bank, or other intermediary as the stockholder of record, you should contact your brokerage firm or bank to be certain that it is automatically reinvesting distributions on your behalf. If they are unable to reinvest distributions on behalf, you should have your shares registered in your name in order to participate.

What other features are available for registered stockholders?

The Distribution Reinvestment and Cash Purchase Plan also allows registered stockholders to make optional cash purchases of shares of the Fund's common stock directly through Computershare on a monthly basis, and to deposit certificates representing your FUND shares with Computershare for safekeeping. Plan participants are subject to a \$0.75 service fee for each voluntary cash purchase under the Plans.

How does the Plan work for registered stockholders?

Computershare maintains the accounts for registered stockholders in the Plan and sends written confirmation of all transactions in the account. Shares in the account of each participant will be held by Computershare in non-certificated form in the name of the participant, and each participant will be able to vote those shares at a stockholder meeting or by proxy. A participant may also send stock certificates for FUND held by them to Computershare to be held in non-certificated form. There is no service fee charged to participants for reinvesting distributions. If a participant elects to sell shares from a Plan account, Computershare will deduct a \$2.50 service fee from the sale transaction. If a nominee is the registered owner of your shares, the nominee will maintain the accounts on your behalf.

How can I get more information on the Plan?

You can call an Investor Services Representative at (203) 656-2430 or you can request a copy of the Plan for your Fund from Computershare. All correspondence (including notifications) should be directed to: Sprott Focus Trust Distribution Reinvestment and Cash Purchase Plan, c/o Computershare, PO Box 30170, College Station, TX 77842-3170, telephone (800) 426-5523 (from 9:00 A.M. to 5:00 P.M.).

¹ Security (or a portion of the security) is on loan. As of December 31, 2018, the market value of securities loaned was \$28,837,318. The loaned securities were secured with cash collateral of \$6,014,564 and non-cash collateral with a value of \$23,022,055. The non-cash collateral received consists of equity securities, and is held for the benefit of the Fund at the Fund's custodian. The Fund cannot repledge or resell this collateral. Collateral is calculated based on prior day's prices.

² Non-Income producing.

³ Represents an investment of securities lending cash collateral.

Portfolio Turnover Rate	31%	29%	35%	34%	29%

¹ Calculated using average shares outstanding during the period.

² The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period. Dividends and distributions are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund's Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund's net asset value is used on the purchase and sale dates instead of market value.

Sprott Focus Trust

Notes to Financial Statements

Summary of Significant Accounting Policies:

Sprott Focus Trust, Inc. (the “Fund”) is a diversified closed-end investment company incorporated under the laws of the State of Maryland. The Fund commenced operations on March 2, 1988, and Sprott Asset Management LP and Sprott Asset Management USA Inc. (collectively, “Sprott”) assumed investment management responsibility for the Fund after the close of business on March 6, 2015. Royce & Associates, LLC was the Fund’s previous investment manager.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standard Codification Topic 946 “Financial Services-Investment Companies”.

Effective November 5, 2018, the Fund adopted SEC Regulation S-X disclosure requirement changes. The adopted changes are reflected throughout this report.

At December 31, 2018, officers, employees of Sprott, Fund directors, and other affiliates owned 35% of the Fund.

USE OF ESTIMATES

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses for the period. Actual results could differ from these estimates.

VALUATION OF INVESTMENTS:

Securities are valued as of the close of trading on the New York Stock Exchange (NYSE) (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange, and securities traded on Nasdaq’s Electronic Bulletin Board, are valued at their last reported sales price or Nasdaq official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their highest bid price. Other over-the-counter securities for which market quotations are readily available are valued at their highest bid price, except in the case of some bonds and other fixed income securities which may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. The Fund values its non-U.S. dollar denominated securities in U.S. dollars daily at the prevailing foreign currency exchange rates as quoted by a major bank. Securities for which market quotations are not readily available are valued at their fair value in accordance with the provisions of the 1940 Act, under procedures approved by the Fund’s Board of Directors, and are reported as Level 3 securities. As a general principle, the fair value of a security is the amount which the Fund might reasonably expect to receive for the security upon its current sale. However, in light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security will be the amount which the Fund might be able to receive upon its current sale. In addition, if, between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. The Fund uses an independent pricing service to provide fair value estimates for relevant non-U.S. equity securities on days when the U.S. market volatility exceeds a certain threshold. This pricing service uses proprietary correlations it has developed between the movement of prices of non-U.S. equity securities and indices of U.S.-traded securities, futures contracts and other indications to estimate the fair value of relevant non-U.S. securities. When fair value pricing is employed, the prices of securities used by the Fund may differ from quoted or published prices for the same security. Investments in money market funds are valued at net asset value per share.

Various inputs are used in determining the value of the Fund’s investments, as noted above. These inputs are summarized in the three broad levels below:

Level 1 – quoted prices in active markets for identical securities.

Level 2 – other significant observable inputs (including quoted prices for similar securities, foreign securities that may be fair valued and repurchase agreements).

Sprott Focus Trust

Notes to Financial Statements (continued)

Level 3 – significant unobservable inputs (including last trade price before trading was suspended, or at a discount thereto for lack of marketability or otherwise, market price information regarding other securities, information received from the company and/or published documents, including SEC filings and financial statements, or other publicly available information).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the Fund's investments as of December 31, 2018 based on the inputs used to value them. For a detailed breakout of common stocks by sector classification, please refer to the Schedule of Investments.

	Level 1	Level 2	Level 3	Total
Common Stocks	\$174,876,769	\$2,901,150	\$—	\$177,777,919
Cash Equivalents	—	3,828,000	—	3,828,000
Securities Lending Collateral	6,014,564	—	—	6,014,564
Total	\$180,891,333	\$6,729,150	\$—	\$187,620,483

On December 31, 2018, foreign common stocks in the Fund were valued at the last reported sale price or official closing price as the Fund's fair value pricing procedures did not require the use of the independent statistical fair value pricing service. There were no transfers between levels for investments held at the end of the period.

REPURCHASE AGREEMENTS:

The Fund may enter into repurchase agreements with institutions that the Fund's investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of its underlying securities. The maturity associated with these securities is considered continuous.

FOREIGN CURRENCY:

Net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of foreign currencies, expiration of currency forward contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, including investments in securities at the end of the reporting period, as a result of changes in foreign currency exchange rates.

TAXES:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year.

The cost of total investments for Federal income tax purposes was \$183,509,516. At December 31, 2018, net unrealized appreciation for all securities was \$4,110,967, consisting of aggregate gross unrealized appreciation of \$21,636,099 and aggregate gross unrealized depreciation of \$(17,525,132).

DISTRIBUTIONS:

The Fund pays quarterly distributions on the Fund's Common Stock at the annual rate of 6% of the rolling average of the prior four calendar quarter-end NAVs of the Fund's Common Stock, with the fourth quarter distribution being the greater of 1.5% of the rolling average or the distribution required by IRS regulations. Prior to November 15, 2012, distributions to Preferred Stockholders were accrued daily and paid quarterly. Distributions to Common Stockholders are recorded on ex-dividend date. Distributable capital gains and/or net investment income were first allocated to Preferred Stockholder distributions, with any excess allocable to Common Stockholders. If capital gains and/or net investment income were allocated to both Preferred and Common Stockholders, the tax character of such allocations was proportional. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains,

Sprott Focus Trust

Notes to Financial Statements (continued)

they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

INVESTMENT TRANSACTIONS AND RELATED INVESTMENT INCOME:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Premium and discounts on debt securities are amortized using the effective yield-to-maturity method. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

EXPENSES:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund's operations, while expenses applicable to more than one fund managed by Sprott are allocated equitably.

COMPENSATING BALANCE CREDITS:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian's fee is paid indirectly by credits earned on the Fund's cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments. Conversely, the Fund pays interest to the custodian on any cash overdrafts, to the extent they are not offset by credits earned on positive cash balances.

CAPITAL STOCK:

The Fund issued 1,635,434 and 1,070,002 shares of Common Stock as reinvestments of distributions for the years ended December 31, 2018 and the year ended December 31, 2017, respectively.

INVESTMENT ADVISORY AGREEMENT:

The Investment Advisory Agreement between Sprott and the Fund provides for fees to be paid at an annual rate of 1.0% of the Fund's average daily net assets. The Fund accrued and paid investment advisory fees totaling \$2,171,916 to Sprott for the period ended December 31, 2018. Sprott reimbursed \$74,459 of the Fund's operating expenses for the period ended December 31, 2018. Sprott is not entitled to recoup any fees waived.

PURCHASES AND SALES OF INVESTMENT SECURITIES:

For the year ended December 31, 2018, the costs of purchases and proceeds from sales of investment securities, other than short-term securities, amounted to \$70,741,033 and \$63,290,992, respectively.

Distributions to Stockholders:

The tax character of distributions paid to common stockholders during 2018 and 2017 were as follows:

DISTRIBUTIONS PAID FROM INCOME:	2018	2017
Ordinary Income	\$ 6,271,764	\$ 2,123,800
Long-term capital gain	11,641,151	10,849,950
	\$17,912,915	\$12,973,750

As of December 31, 2018, the tax basis components of distributable earnings included in stockholder's equity were as follows:

Net unrealized appreciation (depreciation)	\$4,111,196
Post October loss*	(601,735)
Undistributed ordinary income	391,456
	\$3,900,917

* Under current tax law, capital losses and foreign currency losses after October 31 may be deferred and treated as occurring on the first day of the following fiscal year.

Sprott Focus Trust

Notes to Financial Statements (continued)

The difference between book and tax basis unrealized appreciation (depreciation) is attributable primarily to deferral of losses on wash sales and the realization for tax purposes of unrealized gains on investments in passive foreign investment companies. For financial reporting purposes, capital accounts and distributions to stockholders are adjusted to reflect the tax character of permanent book/tax differences. Any permanent differences resulting from different book and tax treatment are reclassified at year-end and have no impact on net income, NAV or NAV per share to the fund. For the year ended December 31, 2018 there were no permanent differences requiring a reclassification between total distributable earnings/(losses) and paid-in capital.

Management has analyzed the Fund's tax positions taken on federal income tax returns for all open tax years (2015-2018) and has concluded that as of December 31, 2018, no provision for income tax is required in the Fund's financial statements.

Lending of Portfolio Securities:

The Fund, using State Street Bank and Trust Company ("State Street") as its lending agent, may loan securities to qualified brokers and dealers in exchange for negotiated lenders' fees. The Fund receives cash collateral, which may be invested by the lending agent in short-term instruments, in an amount at least equal to 102% (for loans of U.S. securities) or 105% (for loans of non-U.S. securities) of the market value of the loaned securities at the inception of each loan. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. As of December 31, 2018, the cash collateral received by the Fund was invested in the State Street Navigator Securities Lending Government Money Market Portfolio, which is a 1940 Act money market fund. To the extent that advisory or other fees paid by the State Street Navigator Securities Lending Government Money Market Portfolio are for the same or similar services as fees paid by the Fund, there will be a layering of fees, which would increase expenses and decrease returns. Information regarding the value of the securities loaned and the value of the collateral at period end is included in the Schedule of Investments. The Fund could experience a delay in recovering its securities, a possible loss of income or value and record realized gain or loss on securities deemed sold due to a borrower's inability to return securities on loan. These loans involve the risk of delay in receiving additional collateral in the event that the collateral decreases below the value of the securities loaned and the risks of the loss of rights in the collateral should the borrower of the securities experience financial difficulties.

As of December 31, 2018, the Fund had outstanding loans of securities to certain approved brokers for which the Fund received collateral:

Market Value of Loaned Securities	Market Value of Cash Collateral	Market Value of Non Cash Collateral	Total Collateral
\$28,837,318	\$6,014,564	\$23,022,055	\$29,036,619

Other information regarding the Fund is available in the Fund's most recent Report to Stockholders. This information is available through Sprott Asset Management's website www.sprott.com and on the Securities and Exchange Commission's website (<http://www.sec.gov>).

The following table presents financial instruments that are subject to enforceable netting arrangements as of December 31, 2018.

Gross Amounts Not Offset in the Statement of Assets and Liabilities

Gross Asset Amounts Presented in Statement of Assets and Liabilities ^(a)	Financial Instrument	Collateral Received ^(b)	Net Amount (not less than \$0)
\$28,837,318	—	(\$28,837,318)	—

^(a) Represents market value of loaned securities at year end.

^(b) The actual collateral received is greater than the amount shown here due to collateral requirements of the security lending agreement.

All securities on loan are classified as Common Stock in the Fund's Schedule of Investments as of December 31, 2018, with a contractual maturity of overnight and continuous.

Report of Independent Registered Public Accounting Firm

**To the Shareholders and The Board of Trustees of
Sprott Focus Trust, Inc.**

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Sprott Focus Trust Inc., (the “Fund”), including the schedule of investments, as of December 31, 2018, the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and financial highlights for each of the five years in the period then ended, and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2018, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We have served as the Fund’s auditor since 1998.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018 by correspondence with the custodian. We believe that our audits provide a reasonable basis for our opinion.

(since October 2017) Chief Financial Officer of Sprott Private Wealth LP (since 2016).

¹ Mr. George is an "interested person", as defined in Section 2(a)(19) of the 1940 Act, of the Fund due to his position as Senior Portfolio Manager at Sprott Asset Management USA Inc., the Fund's sub-adviser.

* Appointed on June 9, 2017

Board Approval of Investment Advisory and Subadvisory Agreements

The Board of Directors (the “Board”) of Sprott Focus Trust, Inc. (the “Fund”) met in person at a regularly scheduled meeting on June 8, 2018, in Watch Hill, Rhode Island, for purposes of, among other things, considering whether it would be in the best interests of the Fund and its stockholders for the Board to approve the existing Investment Advisory Agreement by and between the Fund and Sprott Asset Management L.P. and the existing Investment Subadvisory Agreement by and among the Fund, Sprott Asset Management L.P., and Sprott Asset Management USA Inc. (the “Subadvisory Agreement” and, together with the Investment Advisory Agreement, the “Agreements”).

In connection with the Board’s review of the Agreements, the directors who were not “interested persons” of the Fund within the meaning of the Investment Company Act of 1940 (collectively, the “Independent Directors”) requested, and Sprott Asset Management L.P. (“Sprott Asset”) and Sprott Asset Management USA Inc. (“Sprott USA” and, together with Sprott Asset, the “Advisers”) provided the Board with, information about a variety of matters, including, without limitation, the following information:

- nature, extent and quality of services to be provided by the Advisers, including background information on the qualifications and experience of key professional of the Advisers personnel that provide services to the Fund;
- investment performance of the Fund, including comparative performance information for registered investment companies similar to the Fund;
- fees charged to and expenses of the Fund, including comparative fee and expense information for registered investment companies similar to the Fund;
- costs of the services provided and profits realized by the Advisers; and
- economies of scale.

In connection with the Board’s review of the Agreements, the Independent Directors considered the matters set forth above along with the following information:

- Whitney George’s, the Fund’s portfolio manager, long portfolio management tenure with the Fund and its historical investment performance;
- Mr. George’s significant ownership and, thus, stake in the Fund; and
- the Advisers’ experience in managing pooled investment vehicles and accounts.

At the June 8, 2018 meeting, the Board and the Independent Directors determined that the Agreements continue to be in the best interests of the Fund in light of the services, personnel, expenses and such other matters as the Board considered to be relevant in the exercise of its reasonable business judgment and approved them.

To reach this determination, the Board considered its duties under the Investment Company Act of 1940 (the “1940 Act”) as well as under the general principles of state law in reviewing and approving advisory contracts; the requirements of the 1940 Act in such matters; the fiduciary duty of investment advisers with respect to advisory agreements and the receipt of investment advisory compensation; the standards used by courts in determining whether investment company boards have fulfilled their duties; and the factors to be considered by the Board in voting on such agreements. To assist the Board in its evaluation of each of the Agreements, the Independent Directors received materials in advance of the Board meeting from the Advisers. The Independent Directors also met with Mr. George. The Board applied its business judgment to determine whether the arrangements by and among the Fund, Sprott Asset and Sprott USA are reasonable business arrangements from the Fund’s perspective as well as from the perspective of its stockholders.

Nature, Extent and Quality of Services Provided by Sprott Asset and Sprott USA

The Board considered the following factors to be of fundamental importance to its consideration of whether to approve the Agreements: (i) Mr. George’s long tenure as the portfolio manager of the Fund; (ii) Mr. George’s value investing experience and related track record; (iii) background information on the qualifications and experience of the Advisers’ senior management and the key professional personnel that provide services to the Fund; (iv) the Advisers’ experience in managing pooled investment vehicles and accounts and its related organizational capabilities; and (v) the financial soundness of Sprott Inc., each Adviser’s ultimate parent company, including the cash infusion into the company after the proposed sale of one of its business units. The Board noted and took into account a recent sale of a non-U.S. business unit by the parent company of the Advisers, including certain proposed personnel changes.

Investment Performance

The Board noted that the Fund performed well during 2017, fulfilling its investment objective of generating solid absolute returns. The Board found that the Fund’s Net Asset Value increased 18.46% in net asset value (NAV) and a 22.17% gain in market price (both figures reflect reinvestment of dividends) for the 12 months ended December 2017. The Board further found that these returns continue to improve relative to the Fund’s benchmark, with three- and five-year average annual returns of 9.54% and 9.56% comparing more favorably to respective Russell 3000 returns of 11.12% and 15.58% than they had in recent years.

Board Approval of Investment Advisory and Subadvisory Agreements (continued)

Individual stock selection led to the Fund's strong performance. During 2017, Focus Trust's top-five performers were Apple, Sanderson Farms, Westlake Chemical, MKS Instruments and Lam Research.

The Board also noted the disciplined and long-term investment approach of Sprott USA and its portfolio manager.

Although the Board recognized that past performance is not necessarily an indicator of future results, it found that Mr. George, Sprott Asset, and Sprott USA had the necessary qualifications, experience and track record to manage the Fund. In light of the foregoing, the Directors determined that Sprott Asset continued to be the appropriate investment adviser for the Fund and that Sprott USA continue to be the appropriate investment subadviser for the Fund.

Fees and Expenses

The Board discussed with the Advisers the level of the advisory fee for the Fund relative to comparable funds. In addition to the management fee, the Board also reviewed the Fund's total expense ratio and compared it to the Fund's peers. The Fund's 1.00% advisory fee was the same as two of the four peer closed-end funds and its net expense ratio of 1.20% was higher than one peer fund and equal to or lower than the other peer funds. The Board noted that the fees were within range of closed-end funds with similar investment objectives and strategies. It also noted that each of the peer funds had greater assets in the Fund, including certain peer funds with significantly greater assets.

Profitability

With respect to profitability, the Board found the Advisers' profits earned by managing the Fund to be reasonable.

Economies of Scale

The Board considered the existence of any economies of scale in the provision of services by the Advisers and whether those economies were shared with the Fund through breakpoints in its management fees or other means, such as expense caps or fee waivers. The Board noted that the assets of the Fund were too small to meaningfully consider economies of scale and the necessity of breakpoints. The Board concluded that the current fee structure for the Fund was reasonable and that no changes were currently necessary.

Conclusion

It was noted that no single factor was cited as determinative to the decision of the Directors. Rather, after weighing all of the considerations and conclusions discussed above, the entire Board, including all of the Independent Directors, approved the Investment Advisory Agreement and the Subadvisory Agreement, concluding that having the Fund continue to receive services from the Advisers under the

Agreements was in the best interest of the stockholders of the Fund and that the investment advisory fee rate was reasonable in relation to the services provided.

Notes to Performance and Other Important Information

The thoughts expressed in this *Review and Report* concerning recent market movements and future prospects for small company stocks are solely the opinion of Sprott at December 31, 2018, and, of course, historical market trends are not necessarily indicative of future market movements. Statements regarding the future prospects for particular securities held in the Fund's portfolio and Sprott's investment intentions with respect to those securities reflect Sprott's opinions as of December 31, 2018 and are subject to change at any time without notice. There can be no assurance that securities mentioned in this *Review and Report* will be included in the Fund in the future.

Investments in securities of micro-cap, small-cap and/or mid-cap companies may involve considerably more risk than investments in securities of larger-cap companies. All publicly released material information is always disclosed by the Fund on the website at www.sprottfocustrust.com.

Sector weightings are determined using the Global Industry Classification Standard ("GICS"). GICS was developed by, and is the exclusive property of, Standard & Poor's Financial Services LLC ("S&P") and MSCI Inc. ("MSCI"). GICS is the trademark of S&P and MSCI. "Global Industry Classification Standard (GICS)" and "GICS Direct" are service marks of S&P and MSCI.

All indexes referred to are unmanaged and capitalization weighted. Each index's returns include net reinvested dividends and/or interest income. Russell Investment Group is the source and owner of the trademarks, service marks, and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group. The Russell 3000 Index measures the performance of the largest 3,000 U.S. companies representing approximately 98% of the investable U.S. equity market. The Russell 3000 Index is constructed to provide a comprehensive, unbiased and stable barometer of the broad market and is completely reconstituted annually to ensure new and growing equities are reflected. The performance of an index does not represent exactly any particular investment, as you cannot invest directly in an index. Returns for the market indexes used in this report were based on information supplied to Sprott by Russell Investments.

The Price-Earnings, or P/E, Ratio is calculated by dividing a fund's share price by its trailing 12-month earnings-per share (EPS). The Price-to-Book, or P/B, Ratio is calculated by dividing a fund's share price by its book value per share. The Sharpe Ratio is calculated for a specified period by dividing a fund's annualized excess returns by its annualized standard deviation. The higher the Sharpe Ratio, the better the fund's historical risk-adjusted performance. Standard deviation is a statistical measure within which a fund's total returns have varied over time. The greater the standard deviation, the greater a fund's volatility.

Forward-Looking Statements

This material contains forward-looking statements within the meaning of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that involve risks and uncertainties, including, among others, statements as to:

- the Fund's future operating results
- the prospects of the Fund's portfolio companies
- the impact of investments that the Fund has made or may make
- the dependence of the Fund's future success on the general economy and its impact on the companies and industries in which the Fund invests, and
- the ability of the Fund's portfolio companies to achieve their objectives.

This *Review and Report* uses words such as "anticipates," "believes," "expects," "future," "intends," and similar expressions to identify forward-looking statements. Actual results may differ materially from those projected in the forward-looking statements for any reason.

The Fund has based the forward-looking statements included in this *Review and Report* on information available to us on the date of the report, and we assume no obligation to update any such forward-looking statements. Although the Fund undertakes no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make through future stockholder communications or reports.

Authorized Share Transactions

The Fund may repurchase up to 5% of the issued and outstanding shares of its common stock during the year. Any such repurchase would take place at then prevailing prices in the open market or in other transactions. Common stock repurchases would be effected at a price per share that is less than the share's then current net asset value.

The Fund is also authorized to offer its common stockholders an opportunity to subscribe for additional shares of its common stock through rights offerings at a price per share that may be less than the share's then current net asset value. The timing and terms of any such offerings are within the Board's discretion.

Proxy Voting

A copy of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities and information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended December 31 is available, without charge, on the Fund's website at www.sprottfocustrust.com, by calling (203) 656-2430 (toll-free) and on the website of the Securities and Exchange Commission ("SEC"), at www.sec.gov.

Notes to Performance and Other Important Information (continued)

Form N-Q Filing

The Fund files its complete schedule of investments with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Q is available on the SEC's website at www.sec.gov. The Fund's holdings are also on the Fund's website (www.sprottfocustrust.com) approximately 15 to 20 days after each calendar quarter end and remain available until the next quarter's holdings are posted. The Fund's Forms N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. To find out more about this public service, call the SEC at (800) 732-0330.
