Euro Sun continues to show permitting progress with yesterday's announcement of filing of the PUZ (zoning application) with the County of Hunedoara. Moreover, the company is delivering on what it said it would do, including the eleven public information sessions held from late June, in line with ESM's prior guidance of Q3. Stepping back, at 0.1x NAV, even if permitting does take longer, the re-rate between ESM's current multiple and that of a permitted project (~0.6-0.8x in our view) means ESM offers excellent risk adjusted returns from here. The receipt of the ratified Mining License in 2018 and the numerous project design decisions ESM has taken to optimize ESG outcomes (no cyanide, dry stack tailings, <10 household relocation, replanting and forest supplementation). We maintain our BUY rating, and C\$1.35/sh PT based on 0.75x NAV<sub>5%-1850-3.50</sub>.

## Permitting Update: PUZ filed with County of Hunedoara

Euro Sun's announced filing of the PUZ (zoning application) with the County of Hunedoara which involves rezoning the project area for industrial activity from its current designation for pastoral and forest lands. The Environmental Protection Agency (EPA) for the county continues to receive inputs related to the Strategic Environmental Assessment, the other key work stream associated with the PUZ permit. Eleven public information sessions have been held since 26 June, in line with ESM's guidance for the sessions to be held in Q3. The sessions included disclosure and education of the project and mine design including: no cyanide or wet tailings, the replanting of the project areas and ESM's intention to add 300% to forest areas to compensate for affected project areas.

#### Why we like Euro Sun

- 1. Lowest cost developer globally on EV/Resource and EV/production basis
- 2. Rare gold-primary porphyry developer that benefits from >35% copper revenue at spot
- 3. Ratified mining license with optimized ESG project design: tailings dry stack, <10 household relocation, no cyanide. Avoids key issues that plagues Certej (tailings, cyanide) and Rosa Montana (relocation).
- 4. Located in the EU in a mining area

## **Catalysts**

2H21: Completion of PUZ and EIA licensing submissions

- 1H22: SCPe assumed completion of permits and pre-mine finance
- 2H22: SCP modelled build start
- 1H25: SCP modelled first production
