Fission's PLS and NexGen's Rook I projects are undoubtedly world class, so accelerating permitting and development are the main value drivers. In this context, yesterday's capacity funding agreement between Fission and the Metis Nation of Saskatchewan (MNS) is another engagement milestone which again shows strong community and stakeholder relations and strong support for responsible development in Saskatchewan. Yesterday's agreement with MNS follows on engagement, impact benefits, and capacity agreements signed with the Birch Narrows Dene Nation, Clearwater River, and Buffalo River Dene Nations. The agreement with MNS is significant as engagement with the Metis has taken longer to formalize (perhaps due to a more diverse geographical distribution) and therefore is a very positive update for the permitting timeline process. For now, we maintain our estimates and reiterate our BUY rating and C\$1.45/sh price target based on 1.0xNAV<sub>8%-60/lb</sub>. Fission remains a high conviction top pick for us, even more so after the site visit. Looking ahead, we see the completion of the Feasibility Study by 1H23 followed by EIS submission this year as catalysts providing more torque on FCU's stock price. Trading at a more attractive entry valuation than the other Athabasca developers, we think the market is underrating Fission's standalone value (C\$300-500m FCF pa at US\$60/lb), the value of being located in Saskatchewan (stable, Western operating jurisdiction), and the potential to reduce capital intensity by sharing or codeveloping key infrastructure with neighbour NexGen.

### FCU signed capacity funding agreement with MNS, FS in final stages

Fission announced that it has entered into a capacity funding agreement with the Metis Nation of Saskatchewan (MNS), one of the impacted nations as the MNS Northern Region II is host to Fission's PLS project. The signed agreement formalizes the process for FCU and MNS to engage effectively regarding the PLS project, identify potential impacts to MNS, and explore avenues to mitigate them. Fission will fund the work and processes involved under this agreement. The PLS feasibility study is in the final stages before completion.

### Why we like Fission Uranium

- World class size, grade, jurisdiction and setting make this a globally significant asset.
- Trading at less than half of the peer EV/in-situ average
- Has significant exploration holding in the highly prolific Patterson trend to add to 135Mlb resource base
- Significant potential synergies with neighbour NexGen as the two projects are <1km apart</li>

#### **Catalysts**

- 1H23: DFS, permitting and stakeholder relations baseline studies
- 2023: EIA submission
- 2025/2026: Construction start (SCPe 2H25)
- 2028/2029: First production (SCPe 2028)

**ANALYST CERTIFICATION / REGULATION AC:** The analyst and associate certify that the views expressed in this research report accurately reflect their personal views about the subject securities or issuers. In addition, the analyst and associate certify that no part of their compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

**SPROTT CAPITAL PARTNERS EXPLANATION OF RECCOMENDATIONS:** Should SCP issue research with recommendations, the research rating guidelines will be based on the following recommendations:

**BUY:** The stocks total returns are expected to be materially better than the overall market with higher return expectations needed for more risky securities markets

NEUTRAL: The stock's total returns are expected to be in line with the overall market

SELL: The stocks total returns are expected to be materially lower than the overall market

TENDER: The analyst recommends tendering shares to a formal tender offering

**UNDER REVIEW:** The stock will be placed under review when there is a significant material event with further information pending; and/or when the research analyst determines it is necessary to await adequate information that could potentially lead to a reevaluation of the rating, target price or forecast; and/or when coverage of a particular security is transferred from one analyst to another to give the new analyst time to reconfirm the rating, target price or forecast.

NOT RATED ((N/R): The stock is not currently rated
